Buy gigs to enhance what you do and outsource stuff like transcribing and voice overs. Warning - you can easily spent hours reading gigs and categories. But you can sure get some great ideas there.

Sell gigs - keyword rich.

A. Something you can set up as a template that only takes a few minutes. Will make 4 bucks per gig, two weeks clearing time.

B. Send others to your funnel by selling gigs.

1.) Description box - begins with keyword

2.) Watermark every page of a pdf file. Give permission to freely spread it around but intact.

Join:

1. Email

2. Username: Use the Top Keyword or Keyword Phrase. The same as the beginning of your book and website.

3. Password

4. Are you human?

5. Click JOIN button.

6. Check your email and activate by clicking on the link.

7. Edit your profile completely.

A. Graphic image - how about your logo?

8. Set up some gigs - **USE THE SAME KEYWORD/KEYWORD PHRASE** in titles and description. You can have up to twenty gigs.

Tips:

1.) At bottom of gig listing “see my other services at URL” - use your new, keyword rich URL

2.) When you deliver the gig, always include a quick note that says:

“Thanks so much for purchasing my gig. Please leave positive feedback if you are pleased. Also, you can check out the other related services that I offer by visiting my website at URL.”

3.) Have email opt in form on your website.

4.) Always deliver excellence and early, never late.

5.) If you get “swamped”, then change the time frame for delivery and/or suspend the gig until you get caught up.

6.) Make live link pictures on your other sites that link back to your different gigs.

7.) Check out the fiverr.com clones. Can you put your gig on them where your competition is not so great?

What gigs that are in your niche can you do for really quick? Make them keyword rich.

One of the additional benefits, besides the extra cash, is the fact that your URL backlinks increase and the use of your keyword/keyword phrase which how the search engines find you when folks are searching for those keywords.

Here's a thought - do with it what yo wish. Your book as a pdf file, watermarked with your URL and a QR Code on every page and back cover page. Use a different QR Code for each of the clones.

Technically, you have a different book. You will need to manage them, save each in a different folder with the clone name.

IMPORTANT: You will have to check your orders daily and fulfill them manually. For example, you get an order for your keyword rich titled book from three different places. You will need to put the correct pdf file for each one in the fulfillment box immediately.

Gig ► hope to sell something ► collect \$

Marketing Plan Synergetic Leveraging System

Gig ► every page watermarked leading to funnel ► promote gig on walls, boards, tweets, videos, and offline with QR codes ► sell something ► collect \$ ► have them forward, friend, tweet, pin it, etc ► collect email addresses and grow list ► market in that niche to those names ► your stuff in that niche ► market Amazon affiliate items ► on each review home page live link pictures to other reviews and gig so they cross promote each other ► collect more \$ and continue growing the list and marketing other “: in the niche” items

And don't forget the benefits of your KEYWORD RICH Title, Username, URL, Description leveraging each other. On various websites.

List below and on the back sides of this handout ideas, regardless of how far fetched they might be, gigs you can do that are in your niche. Remember, you can outsource the fulfillment of them, once you have a template set up.

As you go through the remaining modules, you will probably find some gig ideas. Write them down as you think about them. Nothing is too ridiculous. As long as you can do it very quickly!
